

Kenneth Fronda

PV Design Engineer

-  Imus City, Cavite, 4103
-  +63936-135-4421
-  kennethfronda24@gmail.com

Experienced and highly skilled PV Design Engineer with five years of expertise in solar energy systems. Proven ability to design, analyze, and optimize photovoltaic (PV) systems for residential and New Homes built house applications. Proficient in industry-standard software for system modeling, load analysis, and energy production estimation. Adept at collaborating with cross-functional teams to ensure efficient project execution.

Skills

- **Technical Skills:** AutoCAD, Aurora Solar, Salesforce CRM, Sub Hub CRM, Solargraf, Near Map
- **Solar Design Analysis:** Shading analysis, Site assessment, Load analysis, System sizing, PV system modeling
- **Project Documentation & Delivery:** PV plan sets, Bill of materials, Structural coordination, Permit package preparation, Electrical sheet preparation
- **Project Delivery:** Utility interconnection applications, AHJ permit coordination, Net metering analysis

PROFESSIONAL EXPERIENCE

- **Design and Proposal Engineer**

Spartan X, Florida, US (Remote)

- Collaborated with cross-functional teams to create innovative design solutions for client proposals, enhancing project alignment.
- Conducted comprehensive analysis of client requirements to ensure accurate project specifications.
- Developed creative design solutions for complex projects, ensuring functionality and aesthetic appeal.
- Collaborated with sales representative to align project goals with strategic business objectives.

2026-JANUARY -
Current

2025-MARCH -
2025-
SEPTEMBER

PV Designer

ION Solar, Provo, Utah (Remote)

- Conducted site assessments to evaluate potential solar energy generation and installation feasibility.
- Collaborated with engineering teams to optimize system designs for performance and efficiency.
- Developed detailed technical drawings using AutoCAD and other design software tools.
- Performed regular quality control checks on PV designs, ensuring accuracy and adherence to established codes and standards.
- Provided detailed shading analysis, identifying optimum panel positioning for minimal energy loss due to obstructions.
- Managed multiple PV design projects simultaneously, maintaining strict adherence to deadlines and client specifications.
- Coordinated with utility companies to ensure compliance with interconnection requirements, facilitating smooth project completion.
- Conducted site evaluations to determine suitable locations for solar installations, maximizing energy production potential.
- Developed comprehensive electrical single-line diagrams for permitting and construction purposes, streamlining project timelines.
- Examined blueprints, technical documentation and customer facilities to determine appropriate locations for installations.
- Prepared plans and drawings for installation of solar photovoltaic systems.
- Put in place systems consistently surpassing code and safety standards.

2024-OCTOBER -
2025-MARCH

PV Design Engineer

Complete Solar, Sta Rosa, Laguna

- Collaborated with clients, contractors, and engineers using Albatross (CRM) to deliver projects on time and within budget.
- Utilize AutoCAD, Aurora Solar, Near Map, and Google Earth for solar system modeling and design.
- Design PV Solar Plan sets, including PV array layout, electrical sheets, structural sheets, and bill of materials (BOM).
- Conducted site assessments, feasibility studies, and load analysis to determine optimal solar solutions.

2020-SEPTEMBER -
2024-OCTOBER

- Ensured compliance with electrical design standards (IEC, NEC) while integrating energy storage systems (backup and non-backup batteries) into designs.
- Provide cross-functional support for SPEC, JCO, and work order teams.
- Developed comprehensive engineering documents for all projects.
- Verified construction documentation to meet client requirements and vision.

Design Engineer

SUNPOWER Philippines Ltd., ROHQ, Sta Rosa , Laguna

- Designed and optimized photovoltaic systems for residential, ground-mounted, carports, and community-level projects, enhancing energy efficiency and reliability.
- Created PV Solar Plan sets, including electrical, structural, and permitting documentation. Applied best practices for design guidelines and standards to enhance system efficiency.
- Supported clients and contractors using Salesforce (CRM) to facilitate project execution and communication.
- Developed PV Solar Plan sets, including electrical, structural, and permitting documentation, applying best practices to meet design guidelines and standards.
- Mentored junior engineers in design principles and best practices for project execution.
- Optimized existing designs, reducing production costs and enhancing overall performance.
- Managed multiple projects simultaneously while adhering to strict deadlines and maintaining a high level of attention to detail.

EDUCATION

2020-MAY –
2014 JUNE

Bachelor of Science in: Electronics and Communication Engineering

EULOGIO "AMANG" RODRIGUEZ INSTITUTE OF SCIENCE AND TECHNOLOGY (EARIST - MANILA) - Manila
