EDUCATION

**EULOGIO “AMANG”
RODRIGUEZ INSTITUTE
OF SCIENCE AND
TECHNOLOGY (EARIST -
MANILA)**

• Bachelor of Science in

**Electronics and
Communication**

Engineering (2014 – 2020)

TECHNICAL SKILLS

- Solar & PV Design: Residential and New Homes PV design; PV array layouts; System sizing; PV modeling; Site Assessment; Shading and Load Analysis.
- Structural Design: Roof attachment, Roof Spacing, PV Racking
- Electrical Design & Energy Storage: Electrical Sheets; Single-Line Diagrams; Panel, Inverter, and Battery Sizing/Specification (ENPHASE with backup and non-backup battery integration and TESLA, SOLAREEDGE)
- Aurora and Solargraf Shading Analysis, System Sizing, Data Collection, Layout

CAREER PROFILE

Experienced and highly skilled PV Design Engineer with over five years of expertise in solar energy systems. Proven ability to design, analyze, and optimize photovoltaic (PV) systems for residential and New Homes built house applications. Proficient in industry-standard software for system modeling, load analysis, and energy production estimation. Adept at collaborating with cross-functional teams to ensure efficient project execution.

PROFESSIONAL EXPERIENCE

Design and Proposal Designer | Spartan X

JANUARY 2025 – PRESENT

- Collaborated with cross-functional teams to create innovative design solutions for client proposals, enhancing project alignment.
- Conducted comprehensive analysis of client requirements to ensure accurate project specifications.
- Developed creative design solutions for complex projects, ensuring functionality and aesthetic appeal.
- Collaborated with sales representative to align project goals with strategic business objectives.

PV Designer | ION Solar

MARCH 2025 – SEPTEMBER 2025

- Create detailed and accurate Photovoltaic (PV) Designs, plan sets, and BOMs that fulfills all system production, electrical, and structural criteria, and requirements of for the project's success through installation and jurisdiction review.
- Responsible for performance values of top quality and high efficiency for merit-based growth and company objectives.
- Work closely with structural engineers and master electricians for accurate and cost-efficient design decisions.
- Coordinate and problem-solve with internal departments and field operations to resolve ongoing and new issues, prioritize assignments, handle project escalations, and maintain project timeline expectations.

PROJECT DELIVERY

- PV plan sets
- Structural coordination
- Electrical coordination
- BOM
- Permit packages
- Jurisdiction review
- Utility interconnection
- AHJ permit coordination

CODES & STANDARDS

- NEC
- IFC
- Code and safety standards

CRM & SOFTWARES

- Salesforce
- Albatross
- Sub Hub
- Pronto
- Microsoft Word, Excel, Powerpoint
- Aurora Solar
- Solargraf
- Near map
- Google Earth
- AHJ Registry

Other Skill

- Circuit & PCB Design
- Programming Languages: C, C++, HTML, MATLAB

PV Design Engineer | Complete Solar

OCTOBER 2024 – MARCH 2025

- Collaborate with clients, contractors, and engineers using Albatross (CRM) to ensure successful project execution within time and budget constraints.
- Utilize AutoCAD, Aurora Solar, Near Map, and Google Earth for solar system modeling and design.
- Design PV Solar Plan sets, including PV array layout, electrical sheets, structural sheets, and bill of materials (BOM).
- Perform site assessments, feasibility studies, and load analysis for optimal solar solutions.
- Ensure compliance with electrical design standards (IEC, NEC) and integrate energy storage systems (backup and non-backup batteries).
- Provide cross-functional support for SPEC, JCO, and work order teams.

Design Engineer | SUNPOWER Philippines Ltd., ROHQ

SEPTEMBER 2020 – OCTOBER 2024

- Designed and optimized photovoltaic systems for residential, ground-mounted, carports, and community-level projects.
- Utilized AutoCAD, Aurora Solar, Pictometry, Near Map, PVSIM, and Google Earth for system modeling and detailed layouts
- Provided client and contractor support via Salesforce (CRM) to ensure seamless project execution.
- Created PV Solar Plan sets, including electrical, structural, and permitting documentation. Applied best practices for design guidelines and standards to enhance system efficiency.
